Welcome to our Biosciences Fair

It’s great to see you at this year’s Biosciences Fair. With a range of companies attending, you can find out just how far your degree can take you.

Many of the employers visiting us today have graduate jobs and placement opportunities available in a number of business areas. You may be surprised by the range on offer.

Here are some key points to make the most of the fair:

• A number of employers will bring Nottingham graduates, who are currently working for them, to the fair. They will happily have a chat with you and give you an idea of what it’s like to work in the sector

• Employers love to know what else you’ve done while you’re studying. At the fair there will be several opportunities you can get involved in, from volunteering and part-time work to mentoring and the Nottingham Advantage Award

• The biosciences placements team will be at the event offering information, advice and support to students considering taking a year-in-industry placement. Whether you’re in your first year and you’ve not considered this option yet, or in your second year looking for a placement for 2017, there’s advice and support available to you

• Be open-minded! Doing a biosciences degree will means you will develop sought-after skills. Speak to a range of employers to understand the scope of careers open to you

Visit our stand to find out how to make the most of your time at university and grab some information on upcoming events.

Our team are here to help you understand and make the most of the graduate jobs market, not just today, but throughout your time at university and once you graduate.

And finally, keep in touch. You can book an appointment to see us at nottingham.ac.uk/careers/appointments

You can also talk to our experts on Facebook or Twitter. If you have a burning question, it’s a great way to get a quick answer.

**Seeking candidates for 2019 placements:** Yes  
**Offering roles for postgraduate students:** Yes – masters and PhD students  
**Ask me about:** The microbiological industries, using microbes in agriculture, placements and work experience

Azotic Technologies Ltd was established to develop and commercialise a natural nitrogen technology that provides a sustainable solution to fertiliser overuse. Azotic Technologies has identified a new platform nitrogen technology. Azotic's N-Fix® technology is based on a food grade bacteria Gluconacetobacter diazotrophicus (Gd) which is derived from sugarcane. N-Fix can be applied as an inoculant or as a seed dressing formulation. By inoculating plant seeds with this beneficial bacteria, it creates a symbiotic relationship for mutual benefit.

**Ask me about:** How many pizzas we make in one day!

We are not a household name. But the world’s biggest and best-known grocery retailers and food service providers know exactly who we are. They trust us to provide them with an extraordinary range of innovative, fresh prepared products. It’s why we are at the leading-edge of the industry. And why our graduate scheme offers graduates broader experience, deeper knowledge and faster career progression.

Our UK customers include Tesco, Marks and Spencer, Sainsbury’s, Waitrose, Asda and Morrisons.
