# **Executive Summary**

Almost all indicators were positive this year, with both cost and energy use reductions achieved. Of particular note was the reduction in electricity use of 3.4% - reversing the usual trend of modest rises each year.

The additional cost reductions of £370,000 delivered this year mean that energy and water costs have been reduced by almost a million pounds over the last two years

Contained within the figures are some significant deviations from last year; firstly a significant fall in steam used for cooling at the Medical School was seen as the investment in high-efficiency electric chillers paid off. Secondly the increase in gas usage at Sutton Bonington was expected due to the introduction of the new CHP units – this resulted in reductions in imported electricity

#### **Key statistics:-**

Energy and water costs, excluding taxes, fell 3% to £10.7 million in 2015/16

**Energy consumption** was down by 1.7%, with gas down 0.6% and electricity down an impressive 3.4%.

**Water usage** decreased marginally to 859,124 cubic metres.

## Other observations:-

Utility costs/m<sup>2</sup> down 7.5% to £18.62

Energy consumption/m<sup>2</sup> down 3.0% to 311kWh/m<sup>2</sup>

Energy costs/student down 6.9% to £358

**Energy consumption/studen**t down 2.4% to 5,968kWh

#### **External factors:-**

The University continues to grow and floor area rose by 1.4% in `15/16 compared to `14/15. The weather was milder, and indicated a decrease in gas usage of 4.6% in a like for like situation (see section 3.A on P.19).

The University has published an annual report showing trends in our energy and water usage every year since 1998. With the increasing attention on carbon emissions, some elements of this report have now been subsumed within the University's Carbon Management Plan (CMP) Annual Report 2015/16 which has been published and is available on the University's website¹. However, we will continue to produce the Energy and Water Report to allow direct comparison on the key areas of utility consumption and costs with earlier years.

Note that most figures relate to the University's financial year of August 1st 2015 to July 31st 2016, with the baseline for comparison being the previous (2014/15) financial year. Utilities continue to be procured via Notice Ltd, which is a wholly owned subsidiary of the University of Nottingham.

# Section 1 - Total Energy Report

# 1.A. - Energy and Water Costs Summary

Overall energy and water costs reduced by 3% to £10.7 million from `14/15. This was principally down to continuing falls in gas prices in the first half of the year, combined with reductions in both gas and electricity consumption.

The overall savings of around £400,000 came principally from the sites where capital investments were made through our carbon reduction plan. These were a Combined Heat and Power (CHP) plant at Sutton Bonington, and new high-efficiency chillers plus controls at the Medical School.

Section 1.K shows that our energy costs per kWh continue to be the lowest in the Russell Group (2014/15 data).

| <b>Energy and Water Costs</b> |              |             |             | Change           |
|-------------------------------|--------------|-------------|-------------|------------------|
|                               | 2013/14      | 2014/15     | 2015/16     | '14/15 to '15/16 |
| University Park               | £ 5,995,749  | £ 5,865,817 | £ 5,886,335 | 0%               |
| Sutton Bonington              | £ 1,765,681  | £ 1,823,916 | £ 1,647,709 | -10%             |
| Jubilee Campus                | £ 1,131,350  | £ 1,133,034 | £ 1,135,665 | 0%               |
| Others                        | £ 672,626    | £ 651,144   | £ 657,604   | 1%               |
| Medical School                | £ 2,098,000  | £ 1,609,500 | £ 1,382,354 | -14%             |
| Total                         | £ 11,663,406 | £11,083,411 | £10,709,666 | -3%              |

Figure 1.A.1 Table of energy and water costs for last 3 years split by campus.

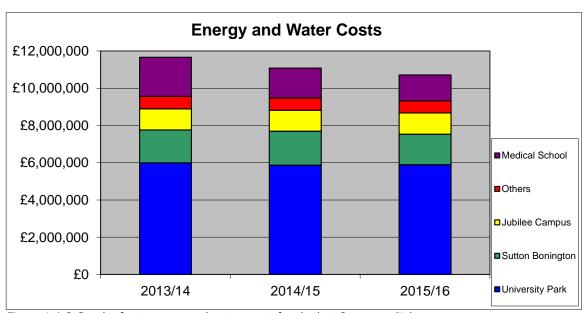

Figure 1.A.2 Graph of net energy and water costs for the last 3 years split by campus.

Note that these figures exclude VAT and Climate Change Levy, which are discussed on page 4.

#### 1.B. - Utility costs per square metre for each Campus

| Campus Costs     |            | Cost/sq.m/annum |         |       |        |  |  |  |
|------------------|------------|-----------------|---------|-------|--------|--|--|--|
|                  | Floor Area | Electricity     | Heating | Water | Total  |  |  |  |
| University Park  | 336,034    | £11.35          | £3.61   | £2.56 | £17.52 |  |  |  |
| Sutton Bonington | 77,293     | £11.15          | £5.30   | £4.86 | £21.32 |  |  |  |
| Jubilee Campus   | 80,255     | £9.28           | £2.34   | £2.53 | £14.15 |  |  |  |
| Others           | 70,830     | £5.69           | £2.35   | £1.24 | £9.28  |  |  |  |
| Medical School   | 77,644     | £7.92           | £8.61   | £1.28 | £17.80 |  |  |  |
| Total            | 642,056    | £10.03          | £4.12   | £2.53 | £16.68 |  |  |  |

Figure 1.B.1 Table of energy costs per square metre, split by campus.

The overall floor area increased by 1.4% from 2014/15. Note that the Medical School costs were £27.77/square metre in 2012/13, meaning that we have seen a reduction of £10/square metre over the three years.

Note that if taxes (VAT and CCL, see below) are taken into account, our average utility costs are now £18.62 per square metre per annum, down 7.5% from `14/15.

# 1.C - Climate Change Levy (CCL) and VAT

VAT costs paid by Notice Ltd on energy bills reduced significantly to £0.96 million in 2015/16, and CCL also reduced to £288,000, meaning that our energy taxes were down by 25% year on year as a result of falling costs and consumption.

The Climate Change Levy (CCL) was introduced in April 2001. On April  $1^{\rm st}$  2016 the rates rose 1.04% to 0.195p/kWh on gas and 0.9% to 0.559p/kWh on the electricity costs of all non-residential properties.

If the taxes were included in the total expenditure on utilities the totals can be seen below:-

|                     |             | 2014/15      | %           |             |             |        |
|---------------------|-------------|--------------|-------------|-------------|-------------|--------|
|                     | Electricity | Fossil Fuels | Water       | Totals      | Totals      | Diff   |
| Utility Costs       | £ 6,437,971 | £ 2,644,252  | £ 1,627,443 | £10,709,666 | £11,083,411 | -3.4%  |
| Climate Change Levy | £ 211,013   | £ 77,425     | -           | £ 288,438   | £360,721    | -20.0% |
| Value Added Tax     | £ 690,908   | £ 266,435    | -           | £ 957,343   | £1,305,219  | -26.7% |
| Total               | £ 7,339,892 | £ 2,988,113  | £ 1,627,443 | £11,955,448 | £12,749,351 | -6.2%  |

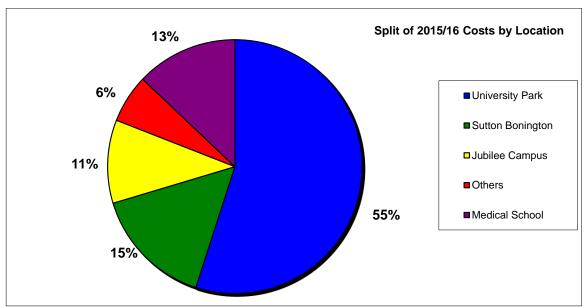

Figure 1.D.2 Chart of energy and water costs split by campus

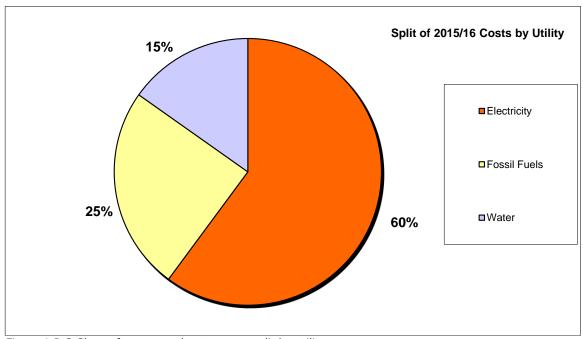

Figure 1.D.3 Chart of energy and water costs split by utility type

# 1.E - Energy Use Summary

Energy consumption, i.e. the total of gas and electricity, decreased by 1.7% year on year even though floor area was up by 1.4% and student numbers by 0.7%.

Electricity usage was down by an impressive by 3.4%, but gas consumption was down by only 0.6%, when the weather *should* have caused a decrease of 4.6%.

The stand-out performance was achieved at the Medical School where capital projects have begun to show significant returns on investment. These have included new high-efficiency chillers, reduction of air infiltration to the voids, and fabric measures such as double glazing.

| Energy Consumption | MWh     | MWh     | MWh     | Change           |
|--------------------|---------|---------|---------|------------------|
|                    | 2013/14 | 2014/15 | 2015/16 | '14/15 to '15/16 |
| University Park    | 102,959 | 105,667 | 108,945 | 3.1%             |
| Sutton Bonington   | 31,205  | 32,294  | 32,292  | 0.0%             |
| Jubilee Campus     | 16,165  | 16,917  | 17,143  | 1.3%             |
| Others             | 12,420  | 12,834  | 12,933  | 0.8%             |
| Medical School     | 34,987  | 35,289  | 28,221  | -20.0%           |
| Total              | 197,736 | 203,001 | 199,535 | -1.7%            |

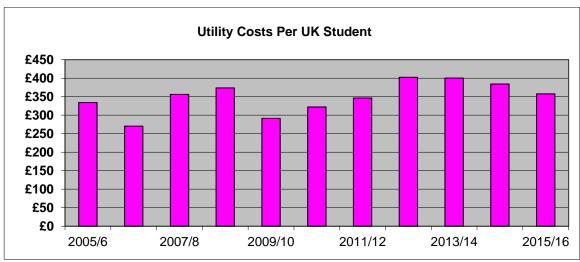

Figure 1.H.4 Graph of gross energy and water costs per UK student since 2005/6.

Note: The statistics on student numbers exclude students not currently studying in Nottingham.

#### 1.I - Utility Costs as a Proportion of University Expenditure

| %age of Expenditure      |   |         |     |         |   |         |   |         | Change |
|--------------------------|---|---------|-----|---------|---|---------|---|---------|--------|
| (£ 000)                  | : | 2012/13 | • • | 2013/14 | 1 | 2014/15 |   | 2015/16 |        |
| Utility Costs inc. taxes | £ | 13,661  | £   | 13,354  | £ | 12,749  | £ | 11,955  | -6.2%  |
| University Expenditure   | £ | 539,400 | £   | 545,900 | £ | 566,900 | £ | 566,900 | 0.0%   |
| Percentage               |   | 2.53%   |     | 2.45%   |   | 2.25%   |   | 2.11%   | -6.2%  |

Figure 1.I.1 Table of last four years gross energy and water costs (including taxes) and total University expenditure.

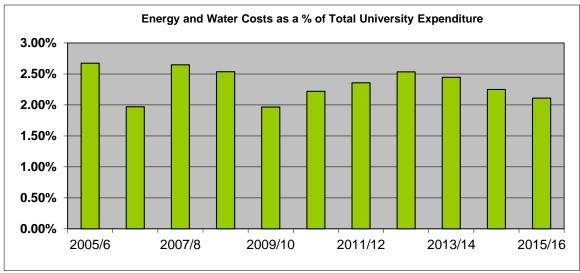

Figure 1.I.2 Graph gross energy and water costs normalised by total University turnover since 2005/6.

# 1.J - The Carbon Reduction Commitment Energy Efficiency Scheme

Costs from the CRC Energy Efficiency Scheme are not included in the other figures in this report, because the scheme operates on an April to March year, costs are not levied on utility bills, and the Scheme operates on a slightly different subset of properties. However, the results of the fifth full year of the scheme (April 2015 to March 2015) are listed below.

Under the Scheme, our emissions were reported as 52,177 Tonnes of CO2 (down 4.1% from 54,434 in the previous year). Each tonne of CO2 emitted needs to be covered by an 'allowance', which costs £16.10 if pre-ordered or £17.20 if bought to comply. 135,000 allowances were pre-ordered in June 2016 at a cost of £2,173,500 in order to cover the majority of our emissions out to the scheme's end in 2018/19.

Note that the cost of 52,177 allowances (£840,050), averaged out across our total energy consumption, equates to 0.421p/kWh.

## 1.K - Energy Costs Comparison to Russell Group Universities - 2014/15

The statistics in the next four tables provide a range of comparators to other major Universities, as reported in the HESA Estate Management Return for 2014/15. Note that this is the most recent year where data is available for comparison, but runs one year behind the other information presented in this report.

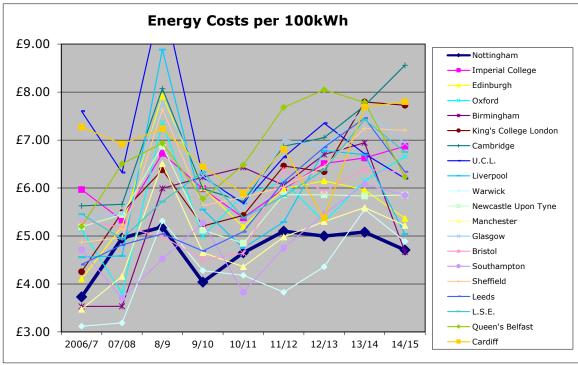

Figure 1.K.1 Graph of Russell Group Energy Costs per 100kWh.

The graph above indicates that our energy prices are still very competitive, and the graph below shows our costs per square metre remain low.

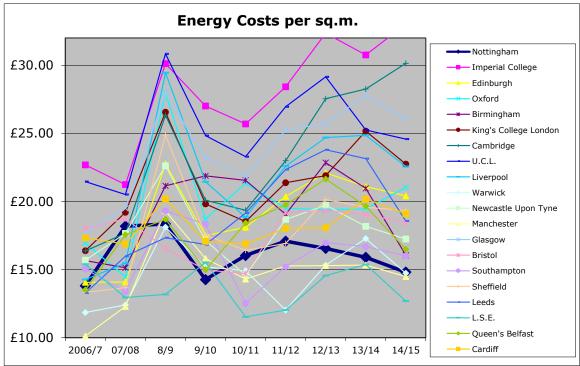

Figure 1.K.2 Graph of Russell Group Energy Costs square metre

## 1.L - Energy Efficiency Comparison to Russell Group Universities - 2014/15

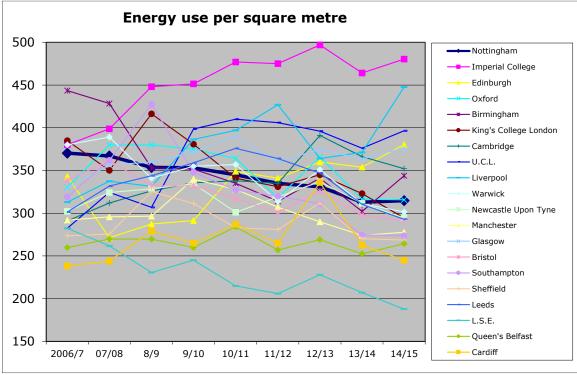

Figure 1.L.1 Graph of Russell Group Energy use per square metre.

The graphs on this page indicate that Nottingham's energy consumption per square metre and energy use per student are better than average within the Russell Group.

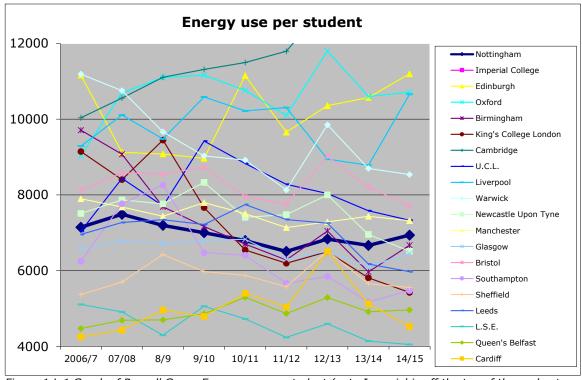

Figure 1.L.1 Graph of Russell Group Energy use per student (note Imperial is off the top of the scale at around 16,000kWh/student).

# Section 2 - Electricity, Gas and Water data

# 2.A - Electricity Consumption

Encouragingly, electricity consumption was down 3.4%, despite the size of the estate increasing buy 1.4%. This was predominantly due to the introduction of two new CHP electricity generating units at Sutton Bonington. These 'combined heat and power' units burn gas to produce electricity, and have also helped reduce our emissions of carbon dioxide.

Additionally the performance at the Medical School was impressive given that new electrically-driven chillers have been added to the site. Savings made elsewhere such as on pumping energy to the now decommissioned cooling towers have more than offset the expected increase.

| <b>Electricity Consumption</b> | MWh     | MWh     | MWh     | Change           |
|--------------------------------|---------|---------|---------|------------------|
|                                | 2013/14 | 2014/15 | 2015/16 | '14/15 to '15/16 |
| University Park                | 46,041  | 46,102  | 46,127  | 0.1%             |
| Sutton Bonington               | 13,280  | 13,251  | 10,099  | -23.8%           |
| Jubilee Campus                 | 8,118   | 8,316   | 8,544   | 2.7%             |
| Others                         | 4,640   | 4,480   | 4,583   | 2.3%             |

See Appendix A for a detailed breakdown of consumption on an account by account basis.

## 2.B - Electricity Costs

Annual baseload electricity prices went on another roller coaster ride, falling from £43/MWh in August 2015 to about £34/MWh by January 2016 before rising steadily back up to £44/MWh in July 2016. Note that these prices are historically rather low for electrical energy, equating to 4.3p/kWh, 3.4p/kWh, and 4.4p/kWh respectively. Actual delivered energy prices – including standing charges – were 8.3p/kWh, meaning that only half of the bill is now energy related.

What has changed significantly over the last few years is the rise in standing charges. For example the Renewables Obligation charge now accounts for 1.558p/kWh or £1.24 million in additional charges, and the feed in tariff charge is now at 0.631p/kWh (£0.50 million overall costs).

We are currently in the final year of a three-year flexible framework contract with Engie for the larger sites, which ends in March 2017, and will procure a new framework contract thereafter.

The University's 'sub-100kW' sites (representing the smaller properties) was retendered in January 2016, and the contract was won by Southern Electric for two years, commencing May 2016. This was a low point for electricity prices and the average price achieved was 10.28p/kWh, a reduction of 18.3% on the previous average.

| <b>Electricity Costs</b> |   |           |   |           |   |           | Change           |
|--------------------------|---|-----------|---|-----------|---|-----------|------------------|
|                          |   | 2013/14   |   | 2014/15   |   | 2015/16   | '14/15 to '15/16 |
| University Park          | £ | 3,571,109 | £ | 3,679,990 | £ | 3,813,419 | 4%               |
| Sutton Bonington         | £ | 1,045,379 | £ | 1,075,835 | £ | 861,973   | -20%             |
| Jubilee Campus           | £ | 665,583   | £ | 692,261   | £ | 744,672   | 8%               |
| Others                   | £ | 374,386   | £ | 378,596   | £ | 403,326   | 7%               |

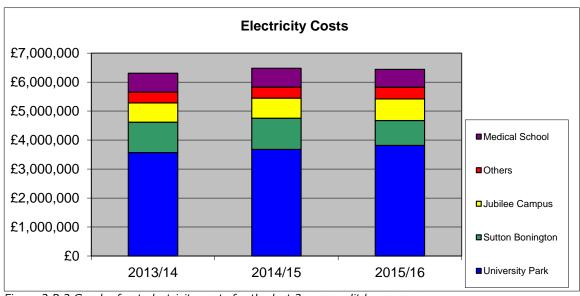

Figure 2.B.2 Graph of net electricity costs for the last 3 years split by campus.

## 2.C - Fossil Fuel Consumption

Consumption of fossil fuels fell by 0.6% year on year. Weather effects alone would have predicted a fall of 4.6%, and floor area increased by 1.4%, so a fall of just over 3% could have been predicted if all else remained equal.

Contained within the figures are some significant deviations from last year; firstly a significant fall in steam used for cooling at the Medical School was seen as the investment in high-efficiency electric chillers paid off. Secondly the increase in gas usage at Sutton Bonington was expected due to the introduction of the new CHP units – this resulted in reductions in imported electricity (see Section 2A). The increases at University Park are largely attributable to a 15% increase (3.7MWh) in gas usage at the Central Heating Station as system temperatures were raised to aid heat distribution, and the addition of the Temporary Sports Facility added 1.3MWh.

| Fossil Fuel Consumption | MWh     | MWh     | MWh     | Change           |
|-------------------------|---------|---------|---------|------------------|
|                         | 2013/14 | 2014/15 | 2015/16 | '14/15 to '15/16 |
| University Park         | 56,918  | 59,566  | 62,819  | 5.5%             |
| Sutton Bonington        | 17,924  | 19,043  | 22,192  | 16.5%            |
| Jubilee Campus          | 8,046   | 8,601   | 8,599   | 0.0%             |
| Others                  | 7,780   | 8,354   | 8,350   | -0.1%            |
| Medical School (Steam)  | 25,363  | 25,295  | 18,233  | -27.9%           |
| Total                   | 116,032 | 120,858 | 120,193 | -0.6%            |

Figure 2.C.1 Table of fossil fuel usage for the last 3 years split by campus.

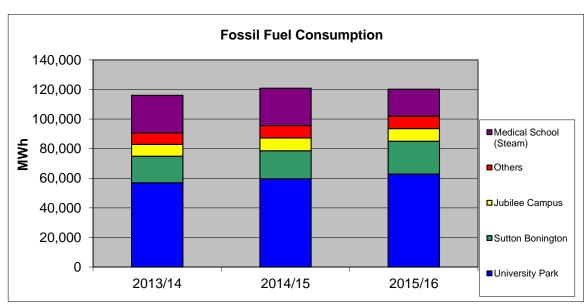

Figure 2.C.2 Graph of fossil fuel usage for the last 3 years split by campus.

See Appendix B for additional information showing a detailed breakdown of consumption on each account.

#### 2.D - Fossil Fuel Costs

Annual gas prices varied even more than electricity prices over the year, dropping from 48p/Therm (1.64p/kWh) in August 2015 to 30p/Therm (1.02p/kWh) in January 2016, before shooting back up to 44p/Therm (1.50p/kWh) in July 2016. Variations for monthly and daily gas were much larger than this. Delivered gas averaged across the year cost around 1.9p/kWh, meaning that standing charges were around 0.7p/kWh, or around 37% of the total.

Our policy of using 'flexible' energy contracts, first adopted in October 2005, allowed us to take advantage of market falls and buy when prices were low. Engie remained as our gas supplier, in the final year of a three-year framework contract ending March 2017.

| Fossil Fuel Costs      |   |           |   |           |   |           | Change           |
|------------------------|---|-----------|---|-----------|---|-----------|------------------|
|                        |   | 2013/14   |   | 2014/15   |   | 2015/16   | '14/15 to '15/16 |
| University Park        | £ | 1,483,859 | £ | 1,259,135 | £ | 1,211,403 | -4%              |
| Sutton Bonington       | £ | 469,169   | £ | 405,206   | £ | 409,787   | 1%               |
| Jubilee Campus         | £ | 224,643   | £ | 197,220   | £ | 188,003   | -5%              |
| Others                 | £ | 217,531   | £ | 188,306   | £ | 166,642   | -12%             |
| Medical School (Steam) | £ | 1,343,000 | £ | 865,000   | £ | 668,417   | -23%             |
| Total                  | £ | 3,738,202 | £ | 2,914,868 | £ | 2,644,252 | -9%              |

Figure 2.D.1 Table of net fossil fuel costs (excluding VAT and CCL) for the last 3 years split by campus.

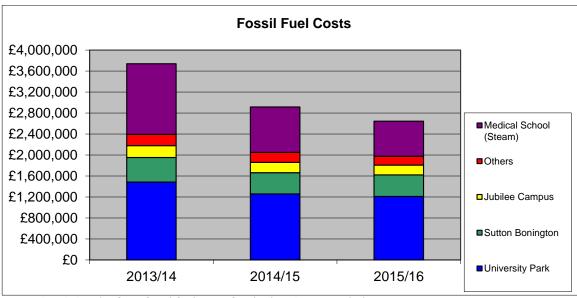

Figure 2.D.2 Graph of net fossil fuel costs for the last 3 years split by campus.

## 2.E - Water Consumption

Water consumption fell marginally to 859,124 cubic metres despite student numbers rising 0.7% and floor area increasing by 1.4%. Reductions were achieved at the Jubilee Campus, where a scheme was introduced to use borehole water to make up for evaporation losses from the ornamental lakes.

Opportunities to improve our own water distribution networks at University Park and Sutton Bonington have been identified following leakage detection work undertaken in 2016.

| Water Consumption | cubic m. | cubic m. | cubic m. | Change           |
|-------------------|----------|----------|----------|------------------|
|                   | 2013/14  | 2014/15  | 2015/16  | '14/15 to '15/16 |
| University Park   | 543,286  | 499,793  | 504,856  | 1%               |
| Sutton Bonington  | 153,525  | 208,402  | 217,745  | 4%               |
| Jubilee Campus    | 87,061   | 88,593   | 71,607   | -19%             |
| Others            | 20,150   | 20,329   | 22,246   | 9%               |
| Medical School    | 47,100   | 43,900   | 42,670   | -3%              |

See Appendix C for a detailed breakdown of consumption on an account by account basis.

#### 2.F - Water Costs

Severn Trent Water's annual price rises occur in April of each year, and in 2016 were 4.64% for summer water, 3.57% for winter water, and 6.4% for used water. However, for the bulk of the year (August to March), we were still benefiting from year on year price reductions of around 4% on most tariff elements.

The de-regulation of the water industry in 2017 will potentially allow large customers such as the University to approach alternative suppliers. In advance of this competitive market for business customers, Severn Trent have partnered with United Utilities to form a major new retail provider called WaterPlus. The University continues to evaluate its options in this regard.

| Water Costs      |       |   |           |   |           |   |           | Change           |

# <u>Section 3 – Environmental Considerations</u>

# 3.A - Weather Data - Degree Days

The year 2015/16 was milder than 2014/15, with a theoretical reduction of 4.6% of heating fuels being necessary. Although the Spring was chilly, the winter was generally mild and November and December were unusually warm.

Degree days are determined by comparing the mean daily temperature to a set temperature, in this case 15.5 Celsius. For instance, a day where the outside temperature averaged 5.0C would be counted as 10.5 degree days. The values are summated over a calendar month and the total provides a reasonably accurate guide as to the relative heating load that should be required. For the purposes of this report, 75% of the change in degree days has been used, as production of domestic hot water typically accounts for about 25% of usage.

| 2015/16 | Deg. Days | Deg. Days | Deg. Days   | Deg. Days    | '13/14to'14/15 |
|---------|-----------|-----------|-------------|--------------|----------------|
|         | 20 Yr Avg | 2013/14   | 2014/15     | 2015/16      | Change         |
| Aug     | 34        | 21        | 46          | 30           | -34.8%         |

|                                | Total |         | 197,077                  |

Figure 3.B.2 Table showing University renewable energy generation.

Note that the biomass production is included in the rest of the report as the fuel is ordered in externally; solar generation is effectively hidden from the rest of the report as it takes place within the relevant buildings. A true figure for energy used in buildings should add back in the solar PV and solar thermal figure.

# 3.D - Comparison with Overseas Campuses (2014/15)

It appears that the overseas campuses have markedly different footprints to the UK; reflecting their unique characteristics. Data has been provided by Estates Office staff at the campuses and will now be monitored going forwards to determine trends.

|                              | UK      | China  | Malaysia |
|------------------------------|---------|--------|----------|
| Floor Area (m <sup>2</sup> ) | 633,307 | 66,487 | 35,127   |
| Electricity (MWh)            | 82,143  | 5,100  | 12,215   |
| Gas (MWh)                    | 120,858 | 0      | 0        |
| Total Energy (MWh)           | 203,001 | 5,100  | 12,215   |
| Water (m <sup>3</sup> )      | 861,016 | 71,005 | 129,295  |

Figure 3.D.1 Table comparing UK energy and water usage with the overseas campuses.

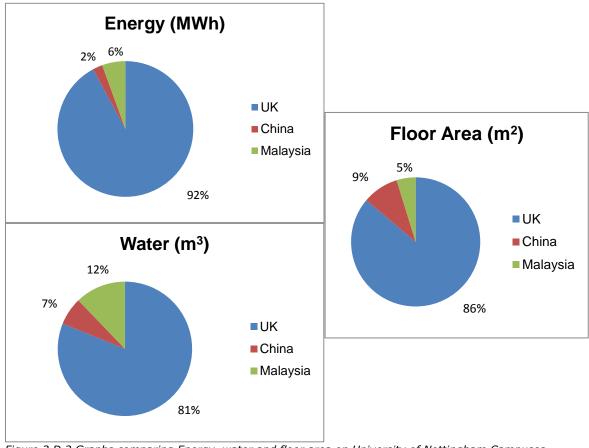

Figure 3.D.2 Graphs comparing Energy, water and floor area on University of Nottingham Campuses.

#### **Energy and Water Efficiency**

|  | UK   | China | Malaysia |
|--|------|-------|----------|
| Electricity (kWh)/m <sup>2</sup>       | 130  | 77    | 348      |
| Water (m <sup>3</sup> )/m <sup>2</sup> | 1.36 | 1.07  | 3.68     |

Figure 3.D.3 Table showing overseas campuses energy and water usage per square metre.
