

Environmental and sustainable policy

Careers fair and events

Paperless fairs:

Thanks to online promotion, we are now able to provide information to students without the need for printed fair guides.

Prior to events, information will be emailed to employers reducing our environmental impact further by discontinuing printed welcome packs.

Help make our fairs more environmentally friendly by reducing the number of printed materials you bring to campus. Encourage students to use online resources, QR codes or Bit.ly link instead.

Promotional items:

If you will be providing promotional giveaways, we encourage you to offer a practical item that will both promote your message and be of use to students.

Consider what the item is made of. Does it contain any recycled material? Can it be recycled when it comes to the end of its life?

Think about the message printed on the item too. By not including the date or other content that wouldn't be appropriate for future events, surplus stock can be used at other events.

Refreshments:

In a bid to reduce plastic waste we no longer provide bottled water to stallholders. Please bring a reusable bottle which can be refilled at one of our fountains on campus. A map of publically available water fountains is available at: nottingham.ac.uk/go/water

Reusable mugs or travel mugs are encouraged as you will be provided with tea and coffee throughout the day.

Waste and Recycling:

Recycling bins are available at all of our events. Please use these as much as possible when disposing of any materials.

Our event take-down team will be happy to recycle your rubbish left at the end of the day, but it would be helpful if any cardboard boxes could be flattened. Please take any unused promotional materials with you so they can be reused.

Transport:

Car sharing is encouraged where possible as you will only receive one parking permit per stand.

Electric car points are available across our campuses. [Find out more](#) about location and usage. Our campuses are extremely accessible via [public transport routes](#) and we encourage this method of travel where possible.

The University of Nottingham is committed to the environment and sustainability. For further information, please refer to: nottingham.ac.uk/sustainability
