AMENITIES BUILDING

Dear Neighbour,

We are pleased to inform you that G F Tomlinson have been appointed by the University of Nottingham as the Principal Contractor for the redevelopment of the Amenities Building - the former HMRC HQ site.

We are delighted to have secured this important scheme which further cements our existing excellent relationship with the University and look forward to starting on site Monday 27th November 2023.

The first few weeks on site will involve the initial site establishment, with hoarding and site welfare units being installed. Following this, exploratory works will begin to provide hard standings and internally, the team will start light strip-out works.

Once complete, the Amenities Building will become the hub of the new Castle Meadow campus for commercial and social activity, with a new bistro and social study spaces.

The building will house a new 'walkable roof' in the main area, with a fully heated and ventilated event and social space, accessed from a new winter garden area.

We will continue to provide you with regular updates throughout the course of the project and keep everyone informed of up and coming activities and site deliveries.

I will be the main point of contact on site during the works, with the support of my colleagues (right). Please find opposite our contact details should you have any queries.

Yours sincerely,

Andy Morris

Senior Project Manager
