CENTRAL BUILDING

Dear Neighbour,

We write to provide you with an update for the redevelopment of the Central Building (formally Amenity Building) for the University of Nottingham.

The site establishment is now complete, with hoarding and fencing around the site perimeter to safely segregate our works. Our site accommodation and welfare units are also now in place.

We are currently working on the surrounding external areas of the building, providing hard standing areas to enable the use of plant and machinery.

Internally, we are stripping out both wings of the building and in the coming weeks we will commence with the removal of the existing sports hall to the ground floor.

We will continue to provide you with regular updates throughout the course of the project.

If you have any queries, please do not hesitate to contact me.

Yours sincerely,

Andy Morris
