

Clinical Placement Assessment Criteria – Level 3

Professional Ability

	100 – 85%	84 – 70%	69 – 60%	59 – 50%	49 - 40%	39 – 0%
Adherence to placement provider policies & procedures	Demonstrates an understanding of the necessity for policies and procedures and consistently applies them in a variety of settings	Demonstrates an understanding of the necessity for policies and procedures and consistently works well within them	Demonstrates an understanding and follows all policies and procedures	Demonstrates an understanding and follows basic policies and procedures	Demonstrates an awareness and follows basic policies and procedures with guidance	Demonstrates a poor understanding of the necessity for discipline and adherence to policies and finds it hard to work within them
Attitude and behaviour	Is always punctual, smart, well-mannered and cooperative, adapting their approach in a variety of settings	Is always punctual, smart, well-mannered and cooperative, adapting approach when needed	Is always punctual, smart, well-mannered and cooperative, identifying the need to modify their approach	Is always punctual, smart, well-mannered and cooperative	Is punctual, smart, well-mannered and cooperative	Is often late without reason and can be uncooperative
Responsibility, initiative and recognition of personal limitations	Demonstrates outstanding initiative and thrives on responsibility	Seeks out opportunities to take on responsibility. Demonstrates significant initiative and always recognises personal limitations	Accepts responsibility and appears to thrive on it. Demonstrates initiative and recognises personal limitations	Accepts responsibility and copes well with it. Demonstrates some initiative but occasionally needs reminding of personal limitations	Takes responsibility with encouragement. Demonstrates some initiative but occasionally needs reminding of personal limitations	Does not take initiative and is reluctant to take responsibility without encouragement
Self-preparation and approach to ongoing learning	Is proactive in self-directed learning, constantly seeking to increase and share knowledge	Is proactive in self-directed learning	Has a positive, self-directed approach to learning	Has a consistent approach to learning but occasionally needs direction with ongoing learning	Has a consistent approach to learning but needs direction with ongoing learning	Has a poor approach to learning and needs considerable direction with ongoing learning
Management of time and workload	Manages time and caseload effectively and independently, demonstrating ability to prioritise and delegate in a variety of situations	Manages time and caseload effectively	Manages time and caseload effectively in most situations	Manages time and caseload with facilitation	Manages time and caseload with guidance	Unable to manage time & caseload even with guidance

Clinical Placement Assessment Criteria – Level 3

Communication

	100 – 85%	84 – 70%	69 – 60%	59 – 50%	49 - 40%	39 – 0%
Interpersonal communication skills	Demonstrates very highly developed interpersonal communication skills, gaining and inspiring confidence from all	Demonstrates highly developed interpersonal communication skills, gaining patients confidence consistently well	Demonstrates highly developed interpersonal communication skills, gaining patients confidence most of the time	Demonstrates well developed interpersonal communication skills, gaining patients confidence some of the time	Demonstrates appropriate interpersonal communication skills gaining patients confidence some of the time	Demonstrates inadequate interpersonal communication skills resulting in difficulties gaining patients confidence
Recognition of psychosocial factors	Identifies and understands the psychosocial and individual needs of patients/carers consistently well and adapts approach readily	Is able to identify and understand the psychosocial and individual needs of patients/carers consistently well	Is able to identify and understand the psychosocial and individual needs of patients/carers most of the time	Is able to identify and understand the psychosocial and individual needs of patients/carers some of the time	Needs prompts to identify and understand the psychosocial and individual needs of patients/carers some of the time	Is unable to identify and understand the psychosocial and individual needs of patients/carers
Insight into individual patient needs	Demonstrates insight to patient needs and is sensitive to patient problems	Understands patient needs and demonstrates insight to patient problems consistently well	Understands patient needs and demonstrates insight to patient problems most of the time	Aware of patient needs and demonstrates insight to patient problems some of the time	Aware of patient needs but has difficulty in gaining insight into their problems	Frequently lacks insight into patients problems and requires guidance and instruction
Communication skills (verbal & non-verbal)	Demonstrates highly developed verbal and non-verbal communication with patients, carers and colleagues, modifying approach as necessary	Demonstrates highly developed verbal and non-verbal communication with patients, carers and colleagues consistently well	Demonstrates highly developed verbal and non-verbal communication with patients, carers and colleagues most of the time	Demonstrates well developed verbal and non-verbal communication with patients, carers and colleagues with occasional prompting	Demonstrates good verbal and non-verbal communication with patients, carers and colleagues with prompting	Demonstrates inadequate verbal and non-verbal communication with patients, carers and colleagues leading to inadequate patient care
Documentation	Demonstrates an ability to record clear and concise patient notes consistently well	Demonstrates an ability to record clear and concise patient notes	Records appropriate patient notes but occasionally needs to be more succinct	Records appropriate patient notes but needs to be more succinct with the use of abbreviations and terminology	Records appropriate patient notes but lacks conciseness and makes occasional omissions	An inadequate ability to record patient notes which lack conciseness, have poor use of language and have frequent omissions

Clinical Placement Assessment Criteria – Level 3

Examination & Assessment

	100 – 85%	84 – 70%	69 – 60%	59 – 50%	49 - 40%	39 – 0%
Utilisation of all relevant sources	Demonstrates an ability to retrieve information from all sources and effectively apply it to decision making	Retrieves information from all sources and is able to utilise it consistently well	Retrieves information from all sources and is able to utilise it most of the time	Retrieves information from all sources and is able to utilise it some of the time	Can identify sources of information but is inconsistent in their ability to utilise	Demonstrates a poor ability to retrieve information from all sources, needing advice and prompts
Selection and implementation of appropriate assessment procedures	Demonstrates a high level of selectivity and justification of assessment procedures and carries out assessment consistently well	Is able to select and carry out appropriate assessment procedures all of the time and consistently justifies procedures used	Is able to select and carry out appropriate assessment procedures most of the time and is able to justify procedures used	Is able to carry out appropriate assessment procedures some of the time and is usually able to justify procedures used	Is able to carry out appropriate assessment procedures with guidance	Demonstrates an inadequate ability in the selection and use of assessment procedures which may compromise patient safety
Evaluation, interpretation and synthesis of assessment findings	Demonstrates an ability to evaluate and interpret findings all of the time and is proactive on the use of appropriate outcome measures	Demonstrates an ability to evaluate and interpret findings all of the time and can identify appropriate outcome measures	Demonstrates an ability to evaluate and interpret findings consistently well and can identify appropriate outcome measures some of the time	Demonstrates an ability to evaluate and interpret findings most of the time but sometimes needs guidance to identify appropriate outcome measures	Demonstrates an ability to evaluate and interpret findings some of the time but needs guidance to identify appropriate outcome measures	Frequently has difficulty evaluating and interpreting findings and is unable to identify appropriate outcome measures
Clinical reasoning skills	Demonstrates highly developed clinical reasoning skills consistently well	Demonstrates highly developed clinical reasoning skills most of the time	Demonstrates well developed clinical reasoning skills most of the time	Demonstrates well developed clinical reasoning skills some of the time	Demonstrates well developed clinical reasoning skills in straightforward cases	Demonstrates an inadequate level of clinical reasoning skills
Application of knowledge and findings to determine treatment aims	Is able to synthesise all relevant information and determine treatment aims consistently well	Is able to apply information and determine treatment aims consistently well	Is able to apply information and determine treatment aims most of the time	Is able to apply information and determine treatment aims in straightforward cases some of the time	Is able to apply information and determine treatment aims in straightforward cases with guidance	Demonstrates an inadequate level of understanding of relevant knowledge and needs advice to determine treatment aims even with straightforward problems

Safety	Pass	Fail
