

UNIVERSITY OF NOTTINGHAM MANUSCRIPTS AND SPECIAL COLLECTIONS

Advice for transferring digital records for permanent preservation

This advice relates to the internal transfer of digital records and archives identified for permanent preservation from university departments to Manuscripts and Special Collections. For information about our collecting policy for paper/physical records please read the <u>Collecting Policy</u>.

Key Points

- Manuscripts and Special Collections actively collect digital records and preserve digital records using our digital preservation system, Preservica.
- Our <u>Digital Preservation policy</u> sets out how the University should approach the preservation of its permanent archives and describes how we care for our digital collections.
- If you have material including digital components that you would like to deposit with us, please get in touch using the departmental mail address: mss-library@nottingham.ac.uk.
- We have several mechanisms by which you can transfer digital material to us, depending on the best approach for you, and the volume of material you wish to transfer.

Preparing to transfer digital content.

We will aim to make the transfer process as easy as possible for you. It would be helpful for us to have some conversations with you about the type of digital content you wish to transfer to us. This is because digital content can be more complex, larger, and have more complicated rights than paper-based content. Please don't worry if you do not know all the answers as we will talk through the questions with you. Ideally any material selected for transfer will be organised into clearly labelled folders with any private or unwanted documents removed prior to transfer.

Our usual transfer route for university created records would be via O365. We have information about transferring content on our <u>Collecting</u> SharePoint site.

Key questions				
Deciding what to transfer	digital material. Please do get in touch so we can help you decide 'how' and 'what' digital content to transfer to us	Identifying only material suitable for long term preservation is key. Material for transfer should be organised prior to transfer. The University's retention schedule can help you with decision making, or contact Information Governance for further advice		
Privacy	· · · · · · · · · · · · · · · · · · ·	We will ensure access to sensitive content is appropriately controlled and managed		
Ownership and	MSC staff will discuss copyright and Intellectual	Ownership:		
Intellectual	property rights with you. We will ask if the	Who created the content?		
Property	records are likely to contain the intellectual	IPR:		
	property of people beside the university	Who owns IPR in material?		

Example transfer methods

Type of transfer	Examples	Comments
Cloud based	O365	We would usually expect to transfer University records
transfer	Email	directly from the O365 storage with your assistance by
		sharing access to existing folders or creating new
		folders for content to be transferred to MSC.
Physical storage	CDs	Transportation must be secure. This content should
media	DVDs	ideally be dropped off or picked up in person. We are
	External hard drives USB devices	used to dealing with legacy/obsolete media types.
	Floppy disks	We may be able to collect content using one of our
		dedicated encrypted portable hard drives (up to 2TB) or
		accept non-sensitive material via post
Websites	Department / school /	We can collect this type of content ourselves using
	Research Institute	automated tools if you provide us with details of
	websites	relevant sites.
	Institutional blogs	Do remember that websites are vulnerable to loss, so it
		is important to act quickly to capture webpages created
		by projects which have finished or departments which have closed
Social media	Facebook	This is approached on a case-by-case basis, we will
	Twitter	work actively to help you archive this type of content.
	Instagram	
Physical devices	Laptop	We would prefer not to take devices such as personal
	Tablet	laptops, tablets, or smartphones. We are unlikely to
	phone	want to access the entire contents and would prefer to
		work with you to retrieve only relevant content from such devices.

What will we do with your digital files?

- We actively preserve the authenticity, integrity, reliability, and usability of your data using a variety of tools and techniques against two main types of threat.
 - Loss of the medium (e.g., corruption or physical loss of the files themselves)
 - Loss of the message (losing the ability to interpret the files or 'bitstreams' in a meaningful way. E.g., because of software obsolescence)
- We will carry out bitstream preservation keeping multiple copies of your deposit in secure locations. We check the integrity of these copies over time to ensure they remain authentic and unchanged.
- We monitor risks associated with the technology required to access digital files and plan as best we can for changes that might affect the ability to access them in the future. We may need to create copies in new formats for the purpose of access (for material open to the public).

Completion of Transfer

You should retain a copy of the transferred digital records until Manuscripts and Special Collections staff confirm successful receipt. We will notify you once we have successfully processed your deposit into our preservation system and complete any necessary paperwork.
