5. What did you like most about this learning object?

# Response

- 1 Easy to use. Interactive
- 2 wearing gloves with sharp instrument
- 3 way of presenting
- 4 it was easily written and could be remembered
- 5 quick and fun
- 6 the easy to understand presentation of the info (video)
- 7 quick and easy to use and complete.
- 8 Information is very clear
- 9 easy to understand and follow and was a fun way of learning
- 10 Excellent subject and a most helpful video.

11	The full explanation of when to use non=sterile and sterile gloves
	jargon-free
	clicks worked
12	intuitive
	sensible
	kept my attention
	improved my opinion of e-learning!
13	interaction
14	Video's showing correct techniques.
15	Visual and audio material will appeal to different learning styles and is also helpful for students with learning disability such as dyslexia.
16	the interactive questionnaires
17	Easy to read
18	Quick and easy to use in a way which retains interest.
19	The assessment was very useful in consolidating my learning.
20	simple easy to use
21	How the different types of gloves can be used for various technqiues
22	video clip and quiz
23	Reminders about over use of gloves, a topic I am trying to influence in my workplace
24	i liked the "click and drag" activity, this is helpful to me so that i know which gloves are for each activity on placement
25	it was very easy to understand and access

6. What did you not like about this learning object?

# Response

1	Some answers ambiguous. Disagree with some answers. May need to wear non-sterile gloves if changing a soiled bed; assisting with hygiene to patients who are incontinent or have blood on them, or who require the nurse to wash their perineal area; cleaning drip stands contaminated with blood.
2	using ring while demonstrating sterile glove use
3	there wasn't a certificate of achievement as proof of completion
4	some unsure of; i have been told to use gloves for bed-making as the patients excretions may well be on the sheets, and also for assisting with washing as you are touching excretary areas.
5	nothing!

	It seems to me, that the gentleman in the video contaminated his sterile field twice.
6	1. when touching the paper after the paper on the gloves did not successfully stay open. 2. When first opening the gloves he touched past the two inch folded margin on the outside of the gloves.
7	Please let me know if you agree with what I said or am I just imagining this?
8	one video on the site didn't work - maybe since I'm looking on the internet
9	add audio?
10	Could have gone into more depth, and I'm only 4 months into the course!
11	n/a Assessments were very easy.
12	I thought it was quite basic but maybe that's all we really need to know!
13	Nothing
14	Liked it all
15	Could have stated that it is useful to fold back the paper of the sterile glove pack to avoid it bending inwards
16	nothing it was fine
17	n/a
18	Some of the videos did not load.
19	Some of the language used would be difficult for some F.E students to understand
20	Read text before realising that it was also spoken - would have preferred text separated ?at end of RLO. Not sure about level but felt some of the expresssions and explanations were rather complex and perhaps difficult for weaker students.
21	I found it quite complicated to use. The media player that was included was difficult to operate initially. I think it may have been pitched at a higher level than it should have been as some of the wording was of a very high level.
22	Needed someone to explain how to start effectively
23	Sentences need to be shorter and non-technical vocabulary should be simpler to enable learners to make the information more readily understood
24	Activity should be the last link not number 3.
25	Cleaning in hospital usually involves chlorclear so perhaps s note should be made that if using potential irritants gloves should be worn for cleaning.
