5. What did you like most about this learning object?

Response

1	I particularly liked the interactive parts.
2	The activity of dragging the name onto the cut hand of the type of response and the crossword was excellant
3	visually very understandable. loved the puzzle at the end and after signalling 1
4	interactive
5	The animation and interaction made it easier to remember the information
6	It was audio-visual
7	good intro to subject
8	EVERYTHING
9	Very clear, very easy to use. Well explained.
10	It was written in plain English, which made it very easy to understand.

11	The use of pictures and clear explanation of inflammatory response
12	The animated graphics assist the user in understanding the material.
13	activities
14	interactive and activities
15	hands on
16	nice visuals, different learning styles addressed
17	I'm a visual learner and it helps for me to see it happening versus reading text
18	Even though crosswords are not my thing it was a really good way of testing and then embedding learning.
19	It was easy to use
20	easy to understand
21	the interactive bits
22	The cross word puzzle was engaging and fun.
23	simplicity to start learning session on inflammatory mediators!
24	concept
25	video for visual learning
26	the visual effects. it could be replayed. the crossword puzzle made you think what you had seen.
27	Acompanining video
28	inovative friendly, local voice
29	Verbal and visual imagery
30	I liked having the diagramatic images that illustrated the process and the interactive puzzles where great
31	The auditory video
32	The quiz helps you to think about what you have just heard
33	simplicity of basic infomation
34	clear and easy to understand
35	interactive elements to appeal to various learning styles
36	the way it explained each step clearly
37	the videos mate
38	ease of use
39	The fact you can watch the video which is a break from just reading and writing. But then you were able to catch up with the written explanation as well
40	The puzzle and the animation
41	Crossword
42	Simplicity and animation
43	good clear images
44	stretched you!
45	The animations effectively introduce the subject.
46	The crossword was interesting to use.
47	Great visuals to help learning
48	good explanation of the role of inflammation with animations
49	The stages made it easy
50	Step by step explanation
51	easy to understand
	It was quick and to the point
52	I teach anatomy and physiology and have trouble getting the point of inflammation across
53	I love the pace and visuals-- very effective in teaching high school students who are getting the information for the first time!

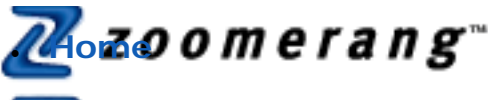

54	Animations
55	simple but accurate graphics, with suitable commentary
56	it talked you through the process
57	The combination of techniques
58	actually made me think and assisting me in reinforcing words and terms.
59	the different approaches to learning helped to reinforce the content. ie written, audio and visual.
60	self-assessments
61	The simplicity in explanation
62	It was interactive. I was able to pause the video if I wanted to write something down or I could read what the narrator was saying.
63	EVERYTHING
64	animation
65	Its usability.

6. What did you not like about this learning object?

Response

1	There wasnt anything I disliked.
2	The speed of the lady talking could of been a bit quicker but liked the audio to it
3	the puzzle didn't fit the page, and it was difficult to locate the finish button (couldn't see it)
4	too short
5	Nothing
6	It took too long to load
7	IS OK
8	a little too simplistic
9	Nothing, it was great.
10	how short it was

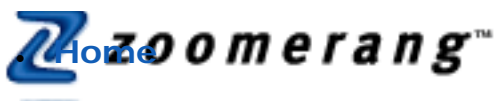

11	I liked everything
12	need more
13	I would have liked the section where you dragged inflammatory chemicals over the wound to have more of a quiz feel...
14	It made me understand just how much i had forgot!!
15	nothing
16	nothing
17	Nothing specific
18	not very good animations
19	Nothing. It was all good
20	having to keep clicking from one place to another
21	Could be more detailed. For example naming the cytokines etc
22	not a lot
23	nothing
24	Nothing!
25	Could benefit from further infomation. ie more specific - what chemical mediators do which particular job, and more specifics on pain
26	liked it all
27	nothing
28	the lack of info mate
29	Nothing
30	simplicity
31	could have had more detail (specifics)
32	in the question on inflammitory chemicals it could be useful to give some idea of the number being looked for. I can't remember whether or not the incorrect objects gave any explanation of what those chemical actually do in the body but this could perhaps be useful.
33	At a high level and the crossword could be very off putting for a lot of lower level students, dyslexics, or ESOL students
34	Activity is too challenging and when introducing this topic, I feel it would be more beneficial to focus on questions related to understanding of the actions involved rather than regurgitation of the vocabulary which I feel would reinforce the learning more effectively.
35	I found this one quite difficult. Perhaps you could give some options to the crossword questions as words are very big and some may be unsure of the spelling
36	found the crossword really fun to do but difficult
37	page on mediators was too advanced for the rest of the presentation. Crossword was hard and focused entirely on vacabulary
38	N/A
39	not satisfied with the examples
40	You could add the formation of fibrin and the respiratory burst and do my job for me!
41	More on tissue repair would have been nice... or posing a good question to check for understanding (when would taking antihistamines be harmful?)
42	nothing specific
43	it was a bit brief
44	Nil
45	not that good at crosswords but manage because of hints.
46	the puzzle did not operate
47	NONE
48	nothing
49	Would have liked more!
