

Primary Cohort Study: Parent/Guardian Survey Consent Form

As a parent of a child in Reception, you have been asked to complete a parent/guardian survey to share your feelings about your child's maths learning.

What am I consenting to?

I give permission for the University of Nottingham to collect, store and use the data that I provide as part of the Observatory for Mathematical Education's Primary Cohort Study:

- ✓ I have read the information and understand the nature and purpose of the research.
- ✓ I understand that my data will be shared with the team of researchers in the Observatory for Mathematical Education at the University of Nottingham.
- ✓ I understand that I may withdraw from the research project at any time and all data about me will be deleted, although my data may still appear, anonymously, in publications or reports that were already in progress or already published at the time of my withdrawal. Withdrawing will not affect me or my child's standing at their school.
- ✓ I understand that while information from the study will be published, my child, myself and the school, will not be identified and my personal data will remain confidential.
- ✓ I understand that my survey answers will be stored securely and not shared with my child, any other parents or my child's school.
- ✓ I understand that I should contact the University of Nottingham mathsobservatory@nottingham.ac.uk if I require further information or wish to withdraw from the research. I understand that I should contact educationresearchethics@nottingham.ac.uk if I have a complaint about my involvement in the research.
- ✓ I agree to take part in this research.
