

190

participants randomised into the POP-I study

2

SIVs have been booked

55

participants randomised in July

6TH

month in a row

We have reached our recruitment target for the

Associate PI Scheme

A huge congratulations to Ben Tyas from University Hospital of North Durham who has just completed his 6-months on the scheme. Well done and thank you!

Follow-up

Please only use postal follow ups as a last resort for patients, we are having poor follow up rates for this method.

Please remember to add a phone number, even if the patient has hasn't chosen phone follow up. Sometimes we call participants if we are yet to receive their follow up.

Co-enrolment

The POP-I TMG has decided that, in the best interest of patients, we won't be undertaking co-enrolment with any other trial. We apologise for any inconvenience caused but this decision prioritises patients and ensures the integrity and clarity of trial results.

To contact the POP-I team please use one of the below:
