That's metrology!

Alicona

Your partner for optical 3D metrology

- » Founded in 2001
- » International team of ~150 employees
- » Constant growth
- » 7 subsidiaries worldwide
- » Large number of global distributors (~35)

Technology Leader in Focus Variation

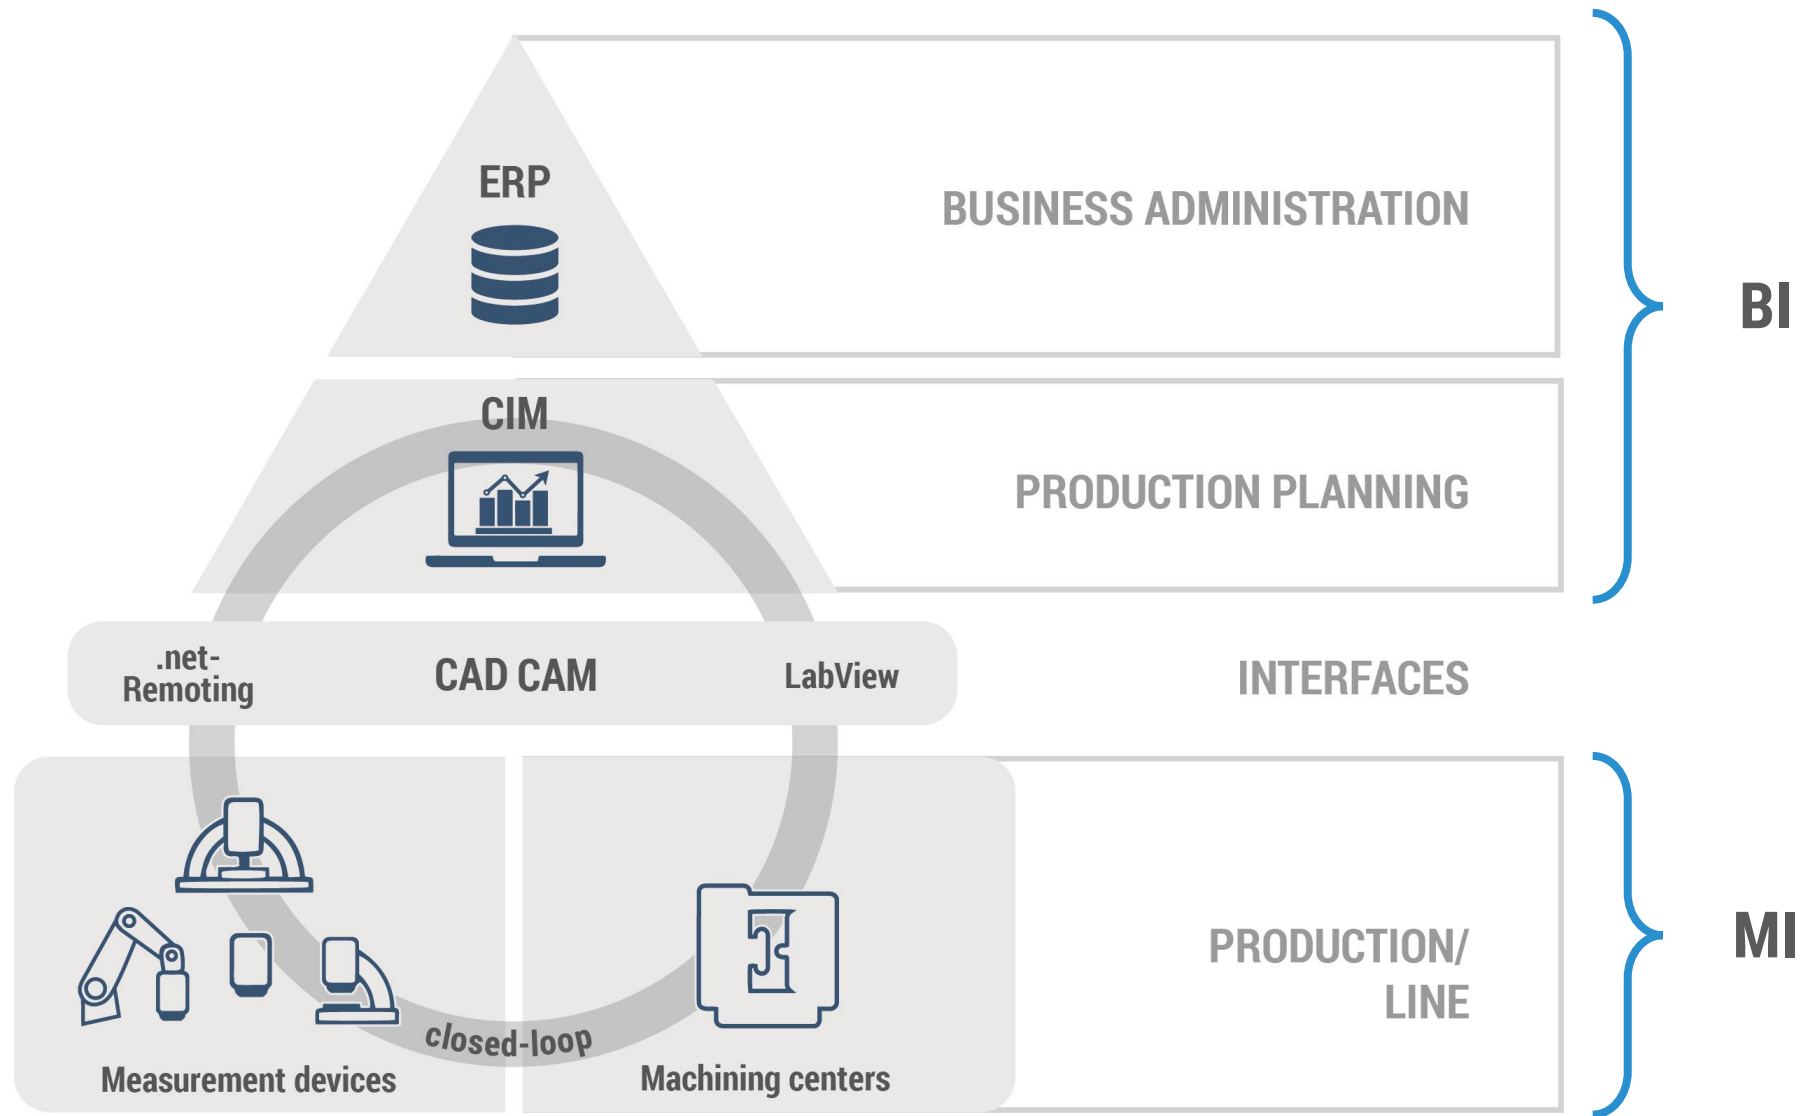

Measurement solutions

1 out of 3 employees base decisions on unreliable data or no data at all

1 out of 2 employees have no access to information that were needed for their job

60% of employees want quicker flow of information for fast decision making

...and this what the **shop floor worker** feels about this!

KLEINER
Stanztechnik

Kleiner Stanztechnik (Stamping), Germany

Going from this...

...to this!

Solution Details

- » 2 HSC milling machines
- » EDM machine
- » Touch probe CMM for datum
- » 6 axis industrial robot

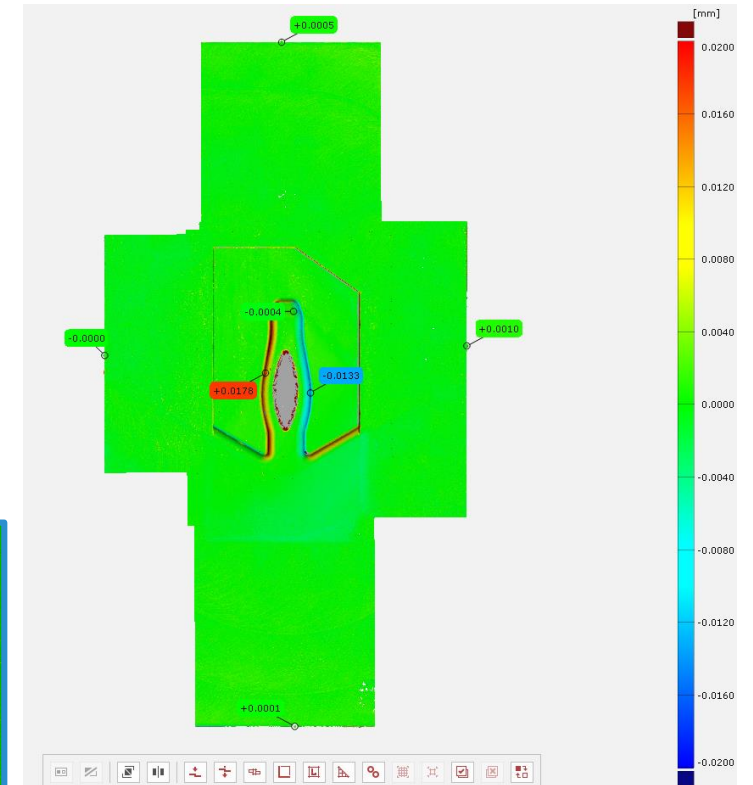

- » Alicona 3D measurement
 - 3D Data acquisition with AutomationManager
 - CAD comparison with Alicona Inspect

- » CAD/CAM
- » AutomationManager Remoting
- » M2M communication interface

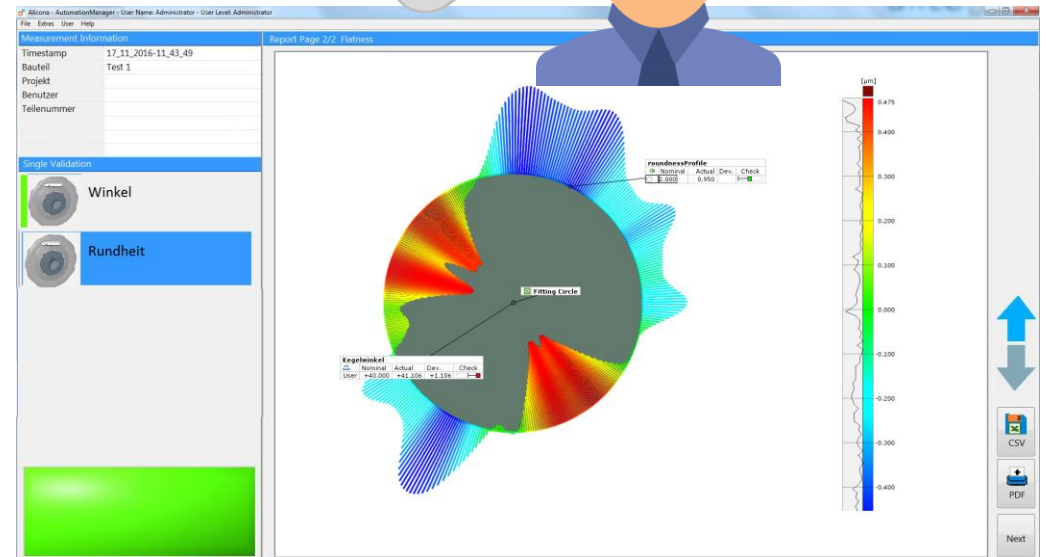

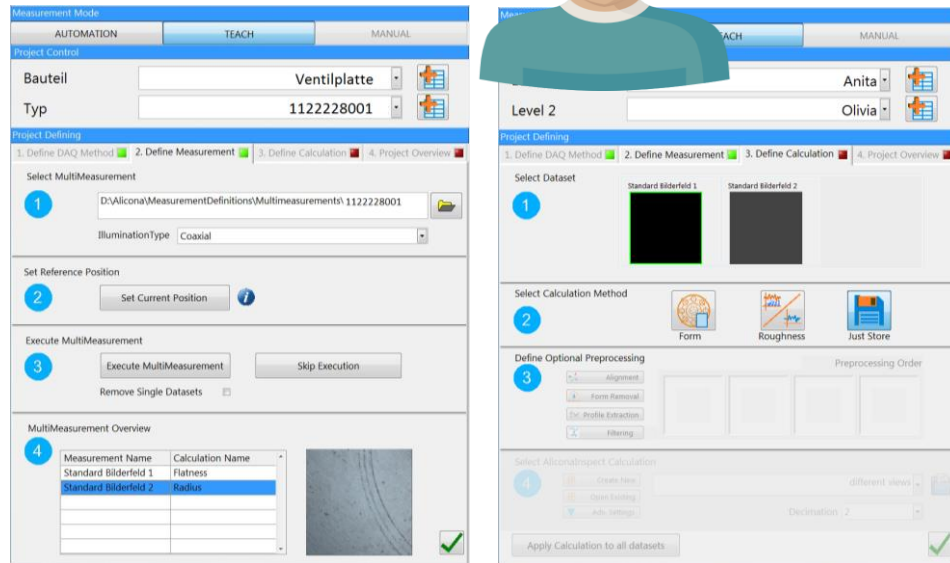

Alicona 3D Measurement Application

- » Surface deviation on free form shapes with tolerances in the one-digit micron area
- » Additional GD&T (tool length, angles, etc)
- » Areal surface roughness

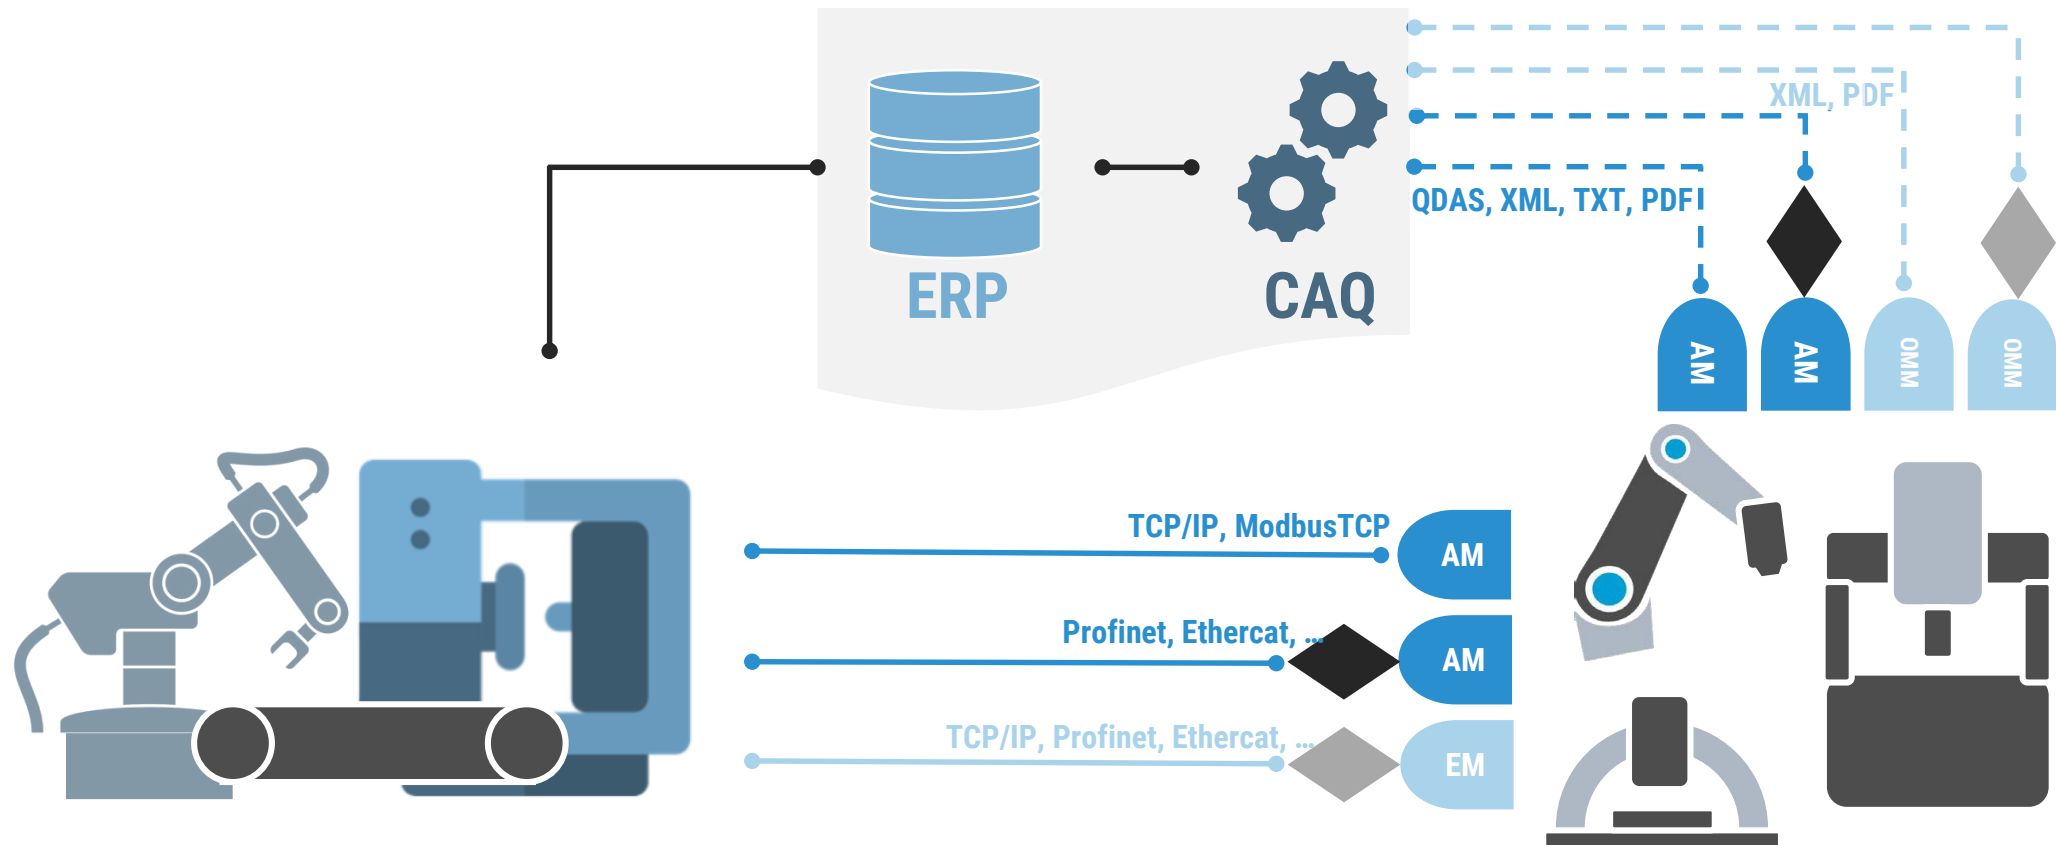

AutomationManager

M2M Communication

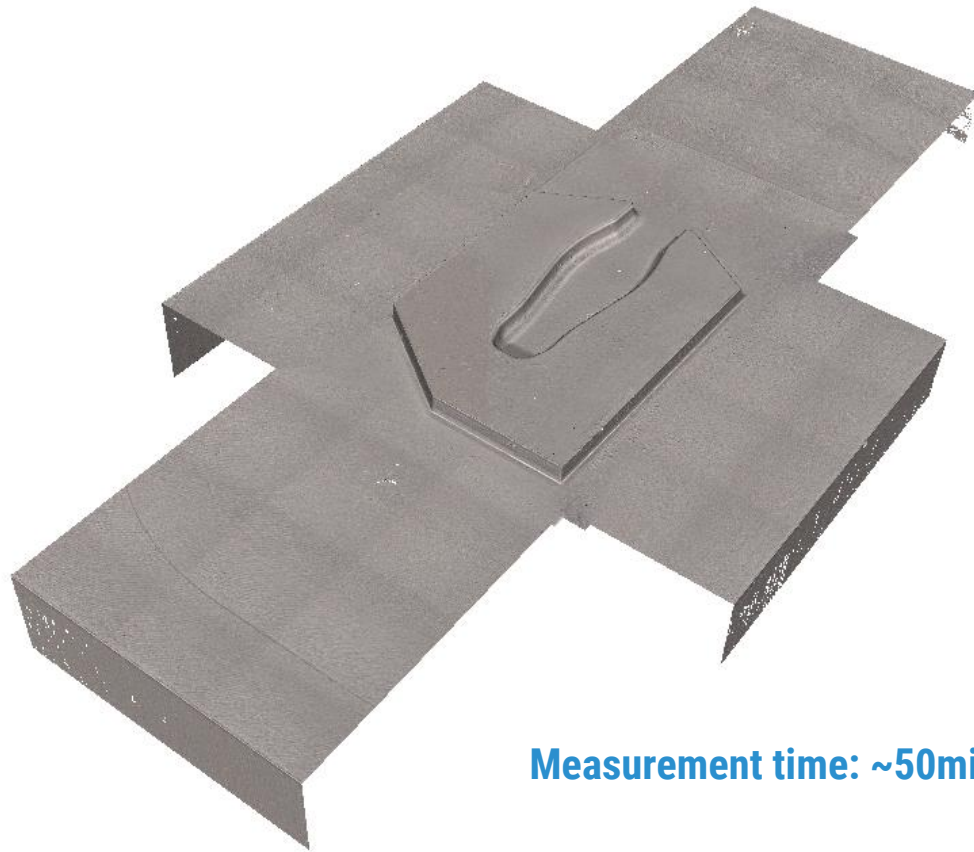

Outlook: μ CMM

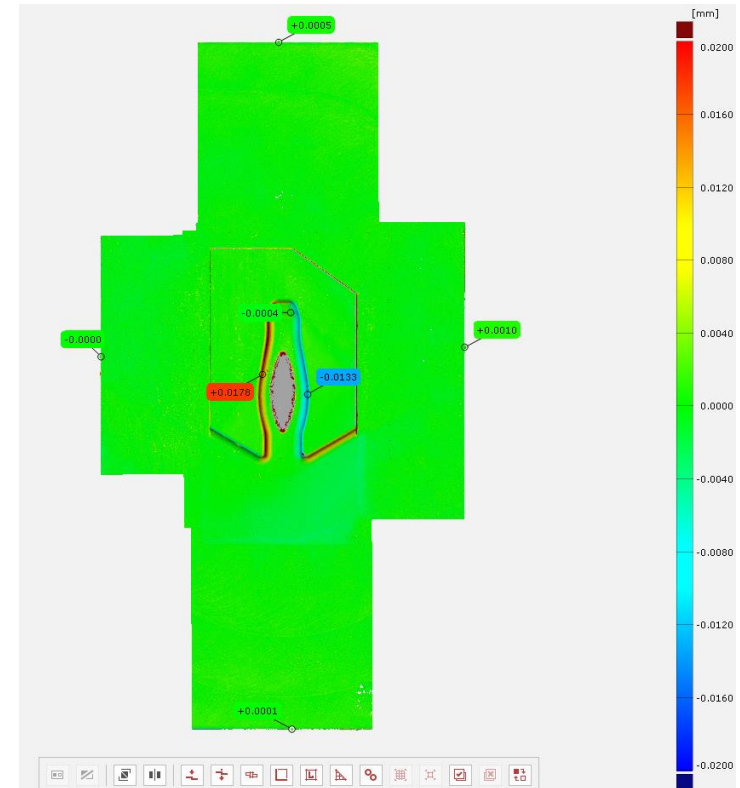

Current Measurement Strategy

Measurement time: ~50min

Local probing strategy with μ CMM

Measurement time: ~8min + removal of touch probe CMM for datum
