

Volunteer Participants Needed!

Evaluating Patients' and Physiotherapist's Perceptions of 3D-Printed Soft-Gloves for Hand Rehabilitation

£20 Voucher as a Compensation!

Are you a physiotherapist, post-stroke or spinal cord injury patient who do hand rehabilitation? Your insights can make a difference!

We are conducting a study to evaluate the **acceptability and usability of a soft glove** designed to assist in the rehabilitation process for post-stroke and spinal cord injury patients.

Why Participate?

- Contribute to advancing 3D printed soft glove for hand rehabilitation
- Share your experiences and feedback

Who Can Join?

Physiotherapists or post-stroke patients and spinal cord injury patients or currently undergoing hand rehabilitation for any other issue.
