Collaborative Design

I never thought I would ever be able to teach these concepts, but now I can – with confidence.”
(Sensitivity and Specificity 2012)

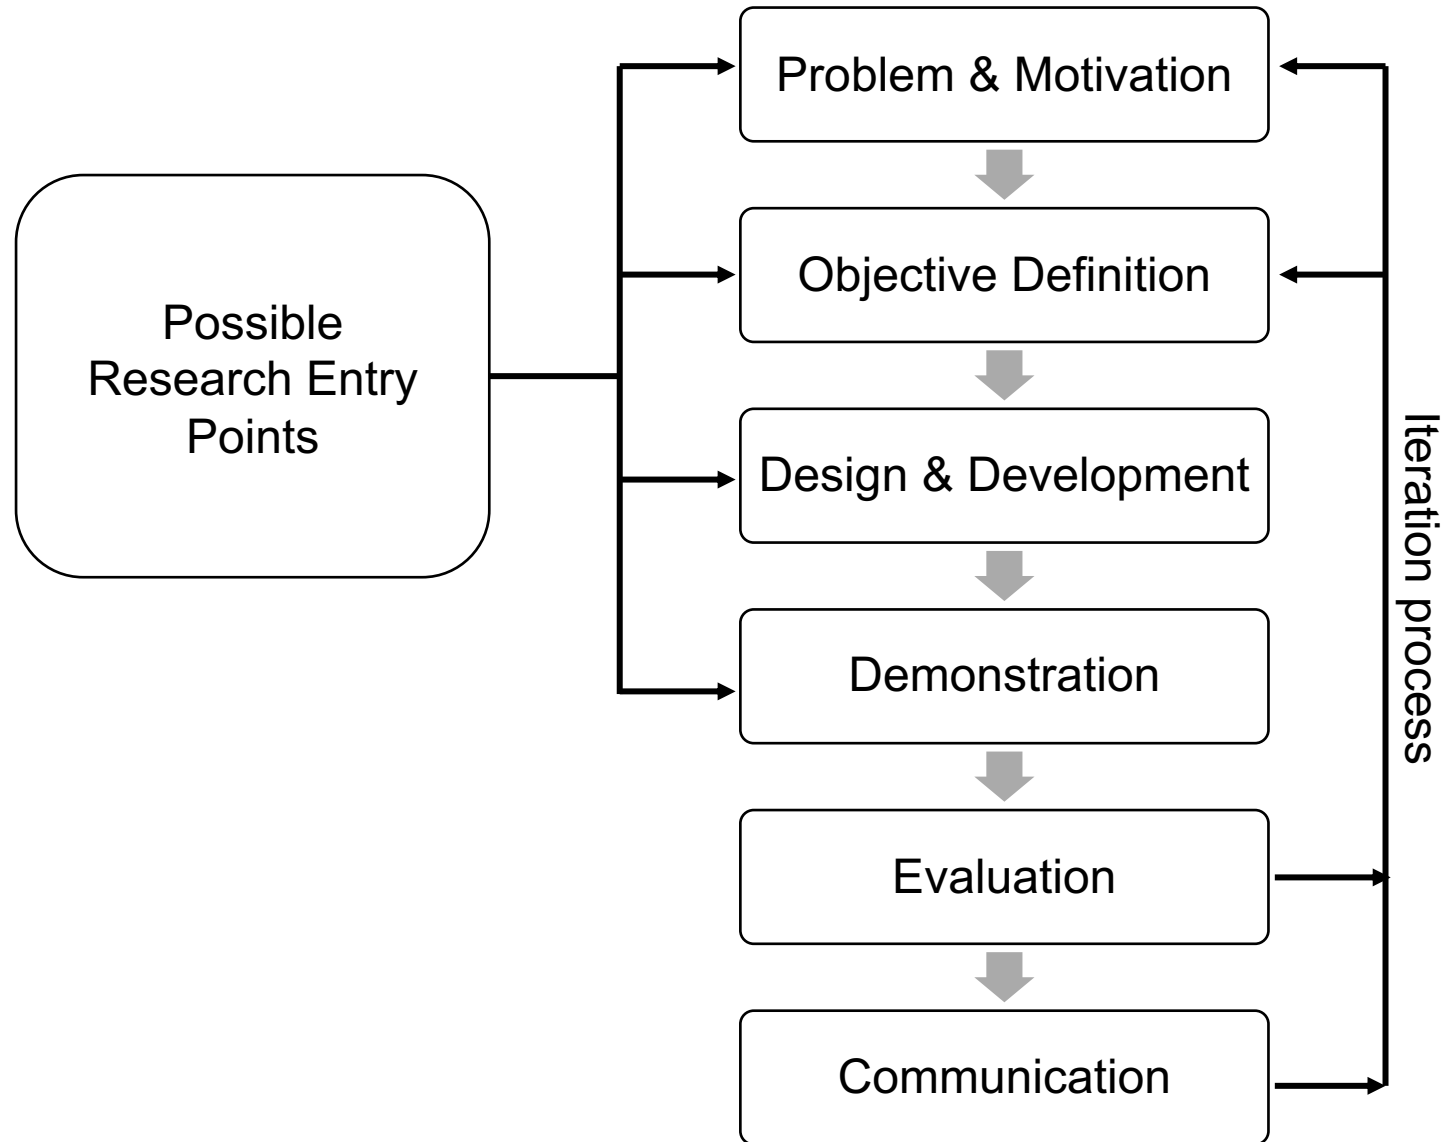

The ASPIRE Framework

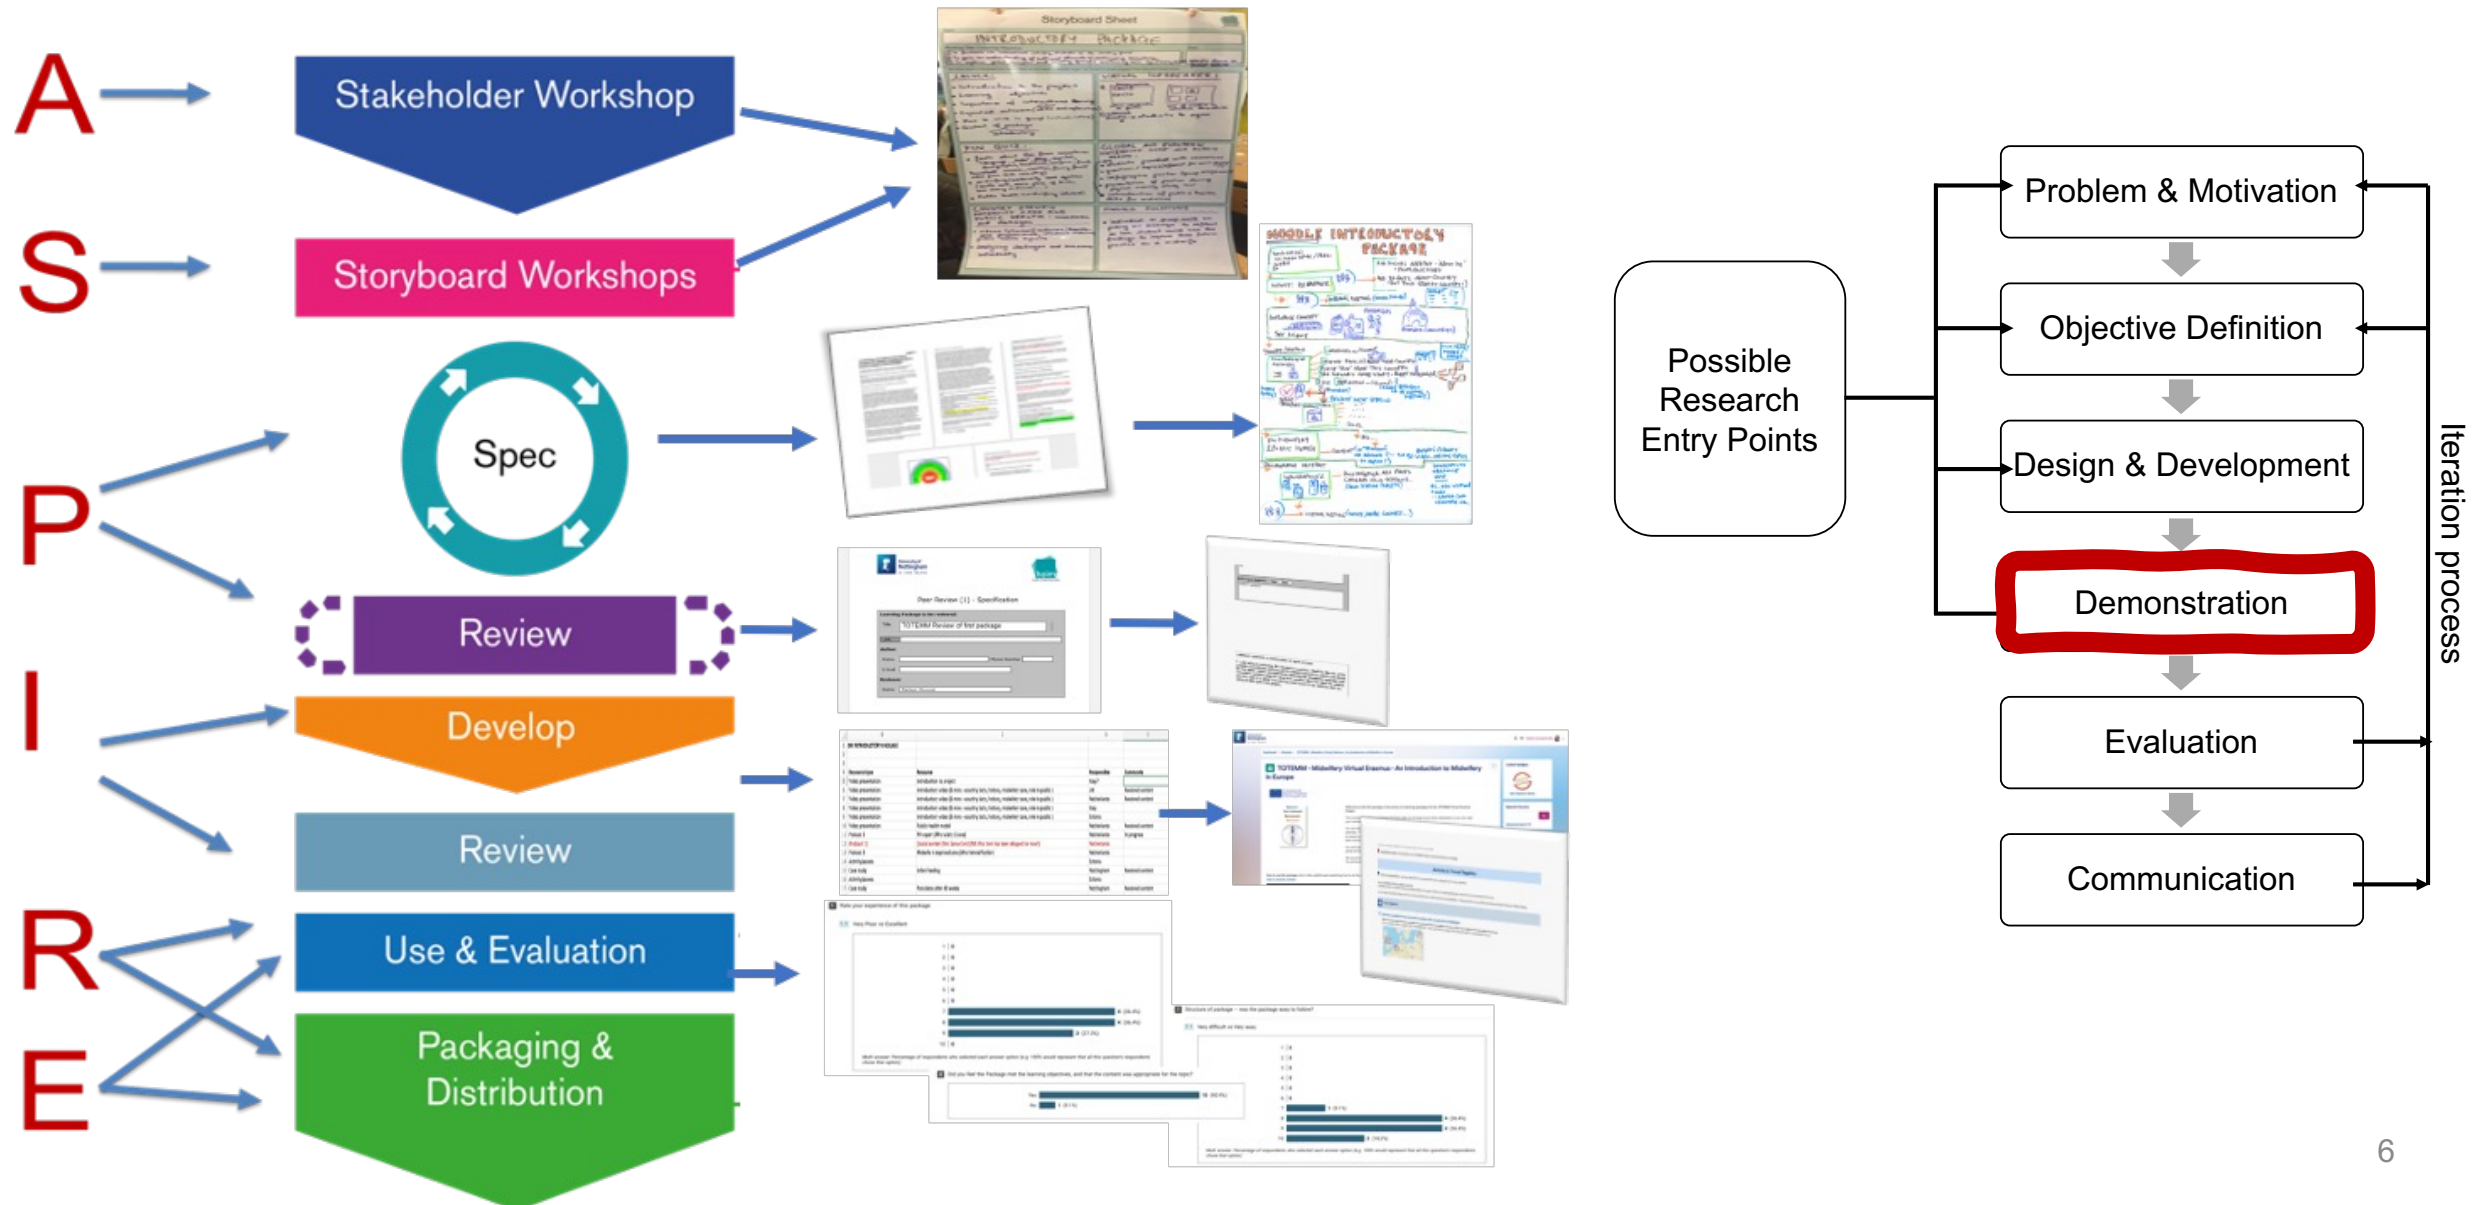

Design Science Approach

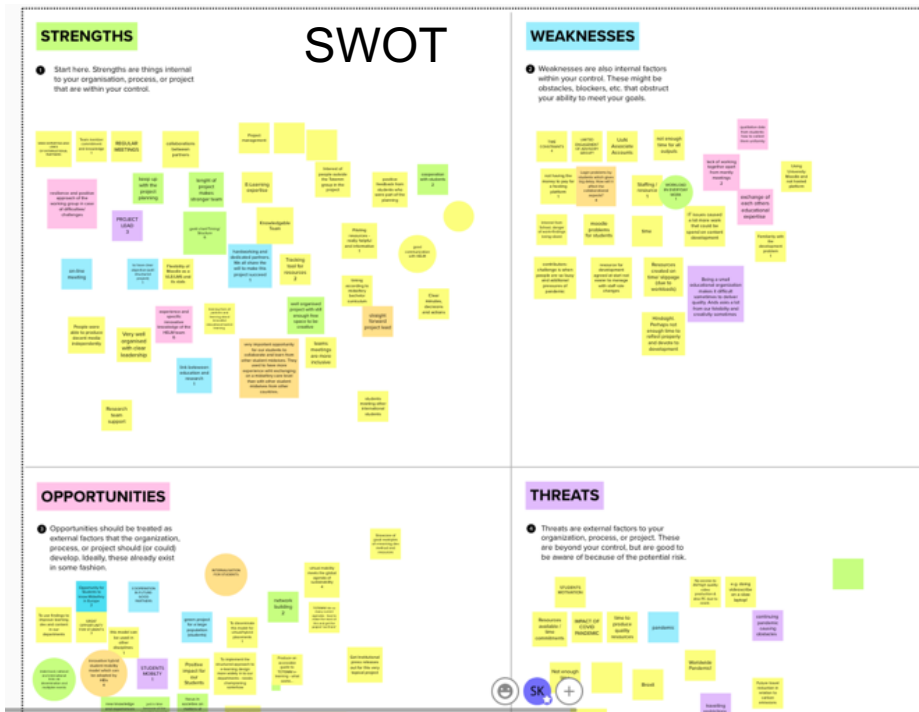

Adapting the ASPIRE framework for Virtual Learning Packages - Demonstration stage

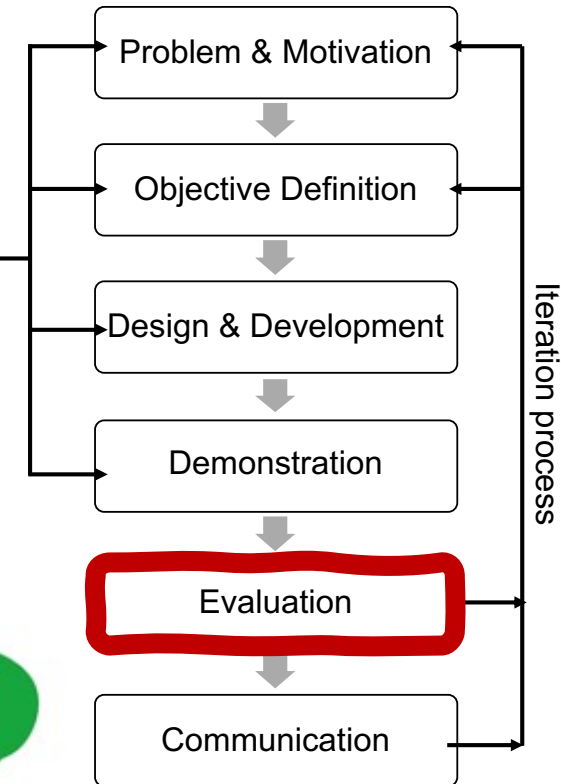

Adapting the ASPIRE framework for Virtual Learning Packages - Evaluation stage

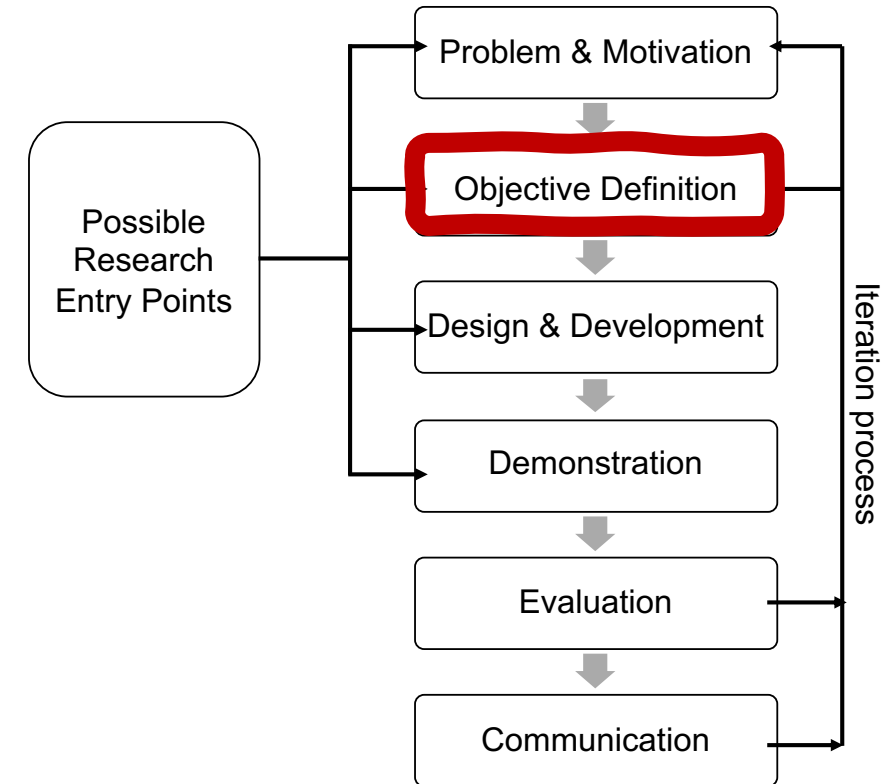

Possible Research Entry Points

Adapting the ASPIRE framework for educational chatbots - Objective Definition stage

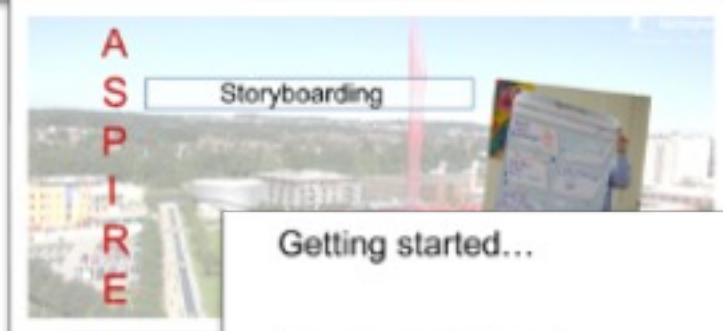

- To raise awareness of the content experts regarding the quality of the specifications
- To reform the specifications in order to fit to the development of a virtual Learning Package having multiple learning objectives instead of single learning objective resources, like RLO
- To minimise the consultation of the learning technologist with the content experts.
- To better coordinate the asset development within an international team.

Adapting the ASPIRE framework for educational chatbots – Design and Development stage

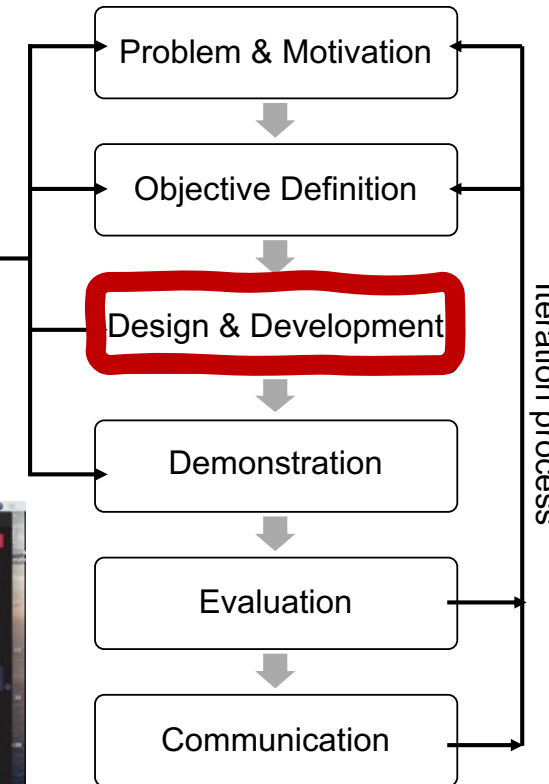

Content Creators' Briefing

- Getting started...
- Focus on your learning aim
 - What are the main areas to be covered?
 - What is the sequence/structure?
 - What will your learners be doing?
 - What is your pedagogical model?
 - How will you /will you assess?

STUDY TITLE: THE IMPACTS OF A BLENDED MOBILITY MODEL ON MIDWIFERY STUDENTS' INTERCULTURAL SENSITIVITY: A MIXED METHODS EVALUATION

FMHS 303-0621

Post-Mobility Survey

Dear Student,

Thank you for agreeing to take part in this survey. We appreciate you taking the time to do this when we know that you are busy with your course.

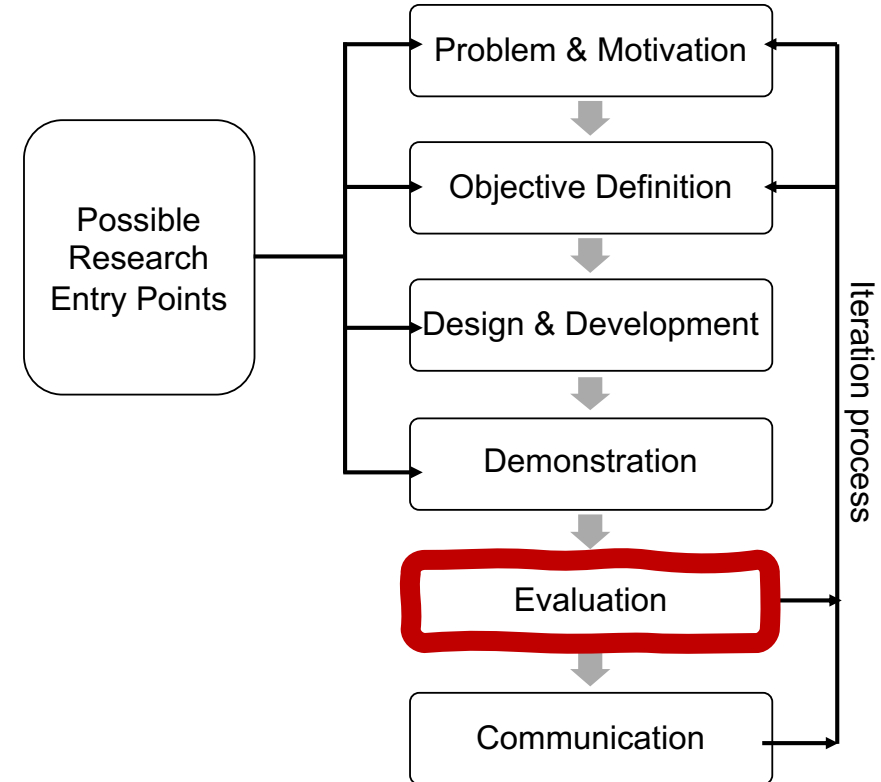

Thank you for your interest in the TOTEMM project. The overall aim of the TOTEMM project is to develop and evaluate a new, blended approach to providing mobility opportunities for midwifery students in European settings. This is the last questionnaire for this project. By answering this short questionnaire, you will help us to understand any impacts and experiences of this new approach to mobility.
